

MODULAR CONVEYORS

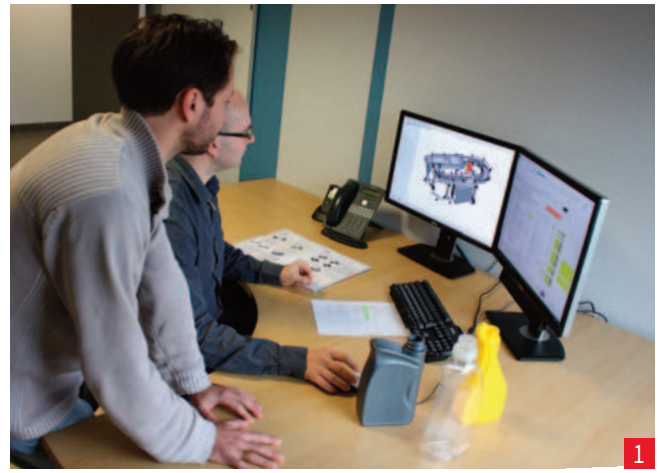

Shared design work

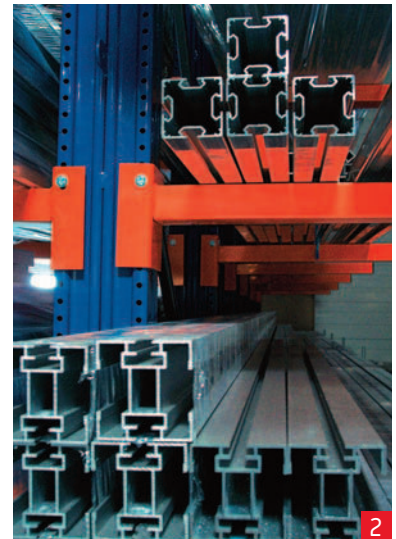

Design of lines in 3D.

More than 30 years
experience in modular
conveyors.

FABER takes over
your transport projects
as soon as you express the need.

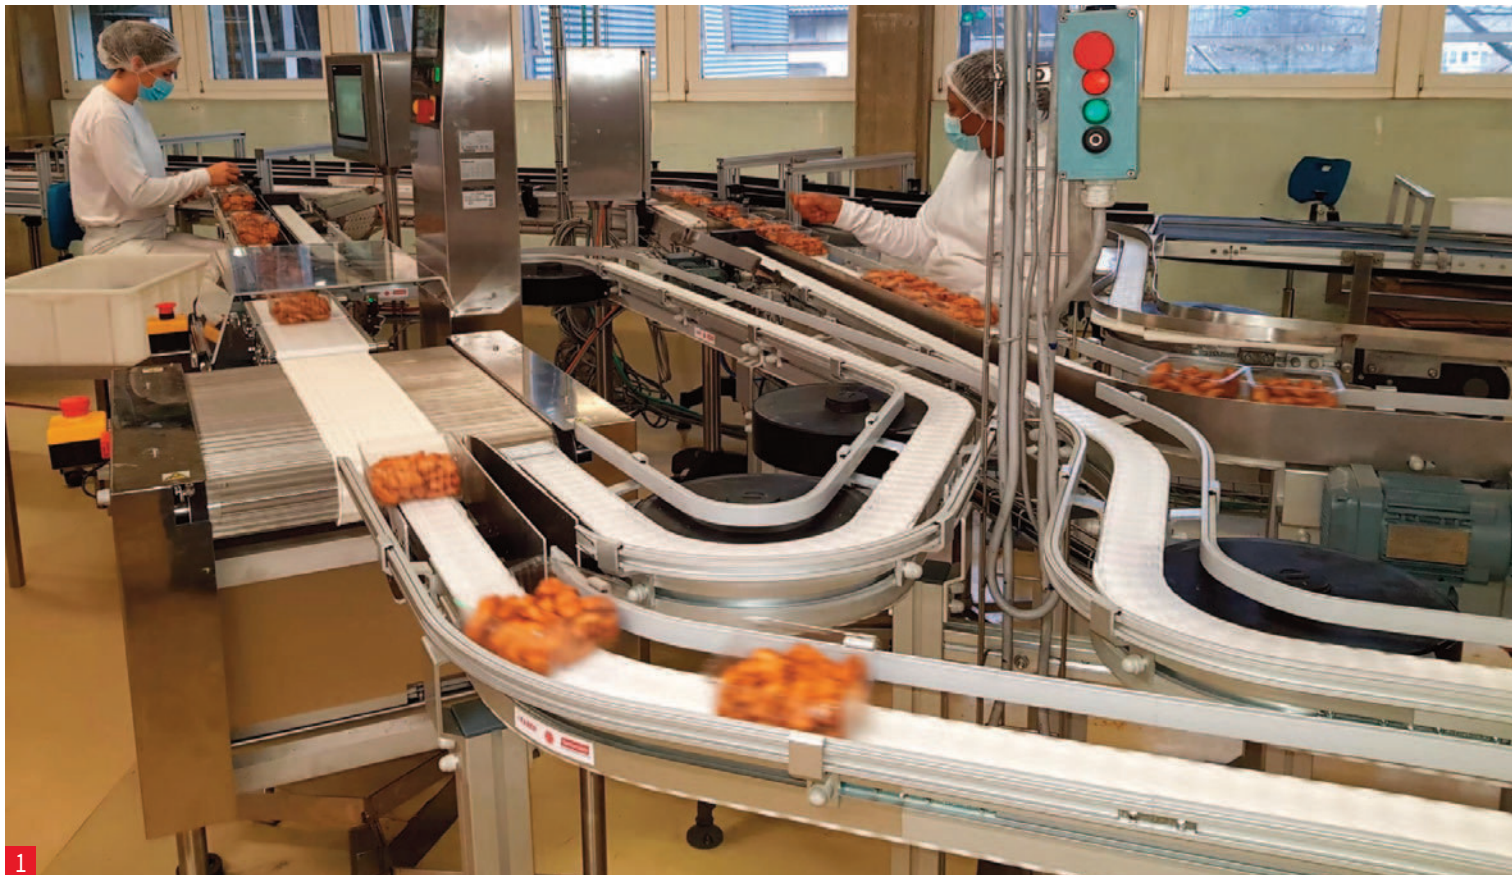

- Based on our standard ranges, we propose kinematics adapted to your needs.
- A network of sales engineers in your area ready to meet you.
- Technical recommendations.
- 2D/3D libraries available to your design office.
- A large stock area
- Reactivity and short delivery lead times
- A continuous quest for innovation (performance, functions, ergonomics, development of new ranges).
- Delivered ready to assemble or fully assembled conveyors.

- 1 *Design office*
- 2 *40 tons of aluminium profiles, thousands of components in stock*
- 3 *Production of curves by digital bending.*
- 4 *Assembly and acceptance in our workshops*

/ Flex 45 to 300 mm width

1

- 1 Food : filmed trays
- 2 Chemistry: cans of cleaning products
- 3 Cosmetics: product conveyors, buckets, pinching
- 4 Bottling: Rotobloc® tooling guidance
- 5 Petfood : metal cans
- 6 Cheese: cardboard boxes
- 7 Pharmacy : single-dose
- 8 Standard chains, flocked, with inserts, with cleats, with rollers
- 9 Cosmetics: box lifters and lowerers

FlexInox®
conveyor :
width 65 to
105 mm.

A standard and cost effective system, suitable for transportation of individual loads.

Flex conveyors can fit to any type of location.

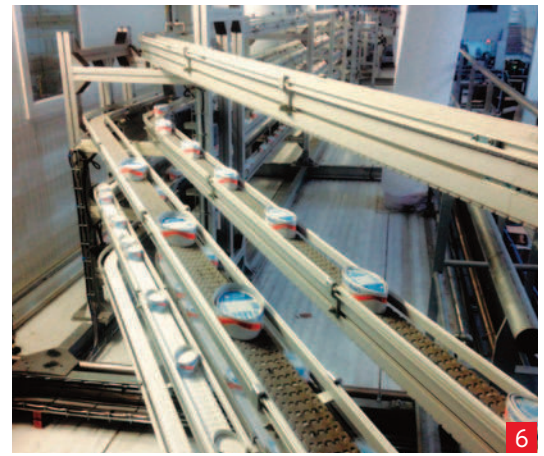

We offer ready-made modules to be assembled or fully assembled conveyors all tested in our workshops.

Accessories (feet, guides, supports,...) are standard to all our ranges.

- Compatible structures and chains and can be connected with thousands of conveyors in service.
- Implementation, transformation or simple and fast evolution.
- Small bending radii
- Low noise level
- Motorized transfers, cable trays, control boxes, variable speed.
- About a hundred types of chains for your specific needs
- 8 widths available: 45, 65, 85, 85, 105, 155, 182, 300 mm

3

4

5

6

- 1 Cheese: cardboard trays
- 2 Logistics: boxes
- 3 Injection : plastic containers
- 4 Biscuit factory: connecting conveyor (product wider than the conveyor)
- 5 Food industry: pasta bags
- 6 Food: egg trays (180° curve)
- 7 Pharmacy: boxes of blisters
- 8 Food: film packs
- 9 Housekeeping products

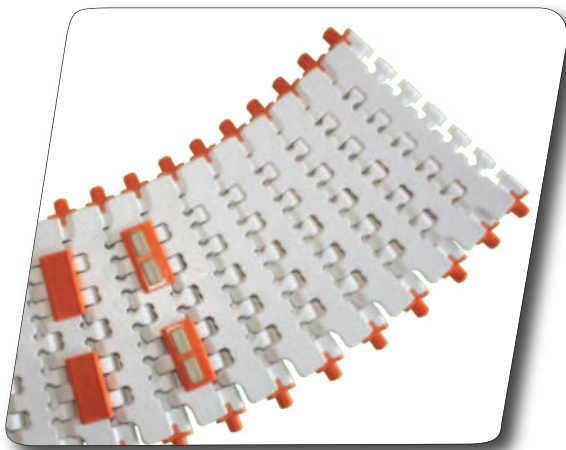

A robust and little noisy system for conveying boxes and voluminous products.

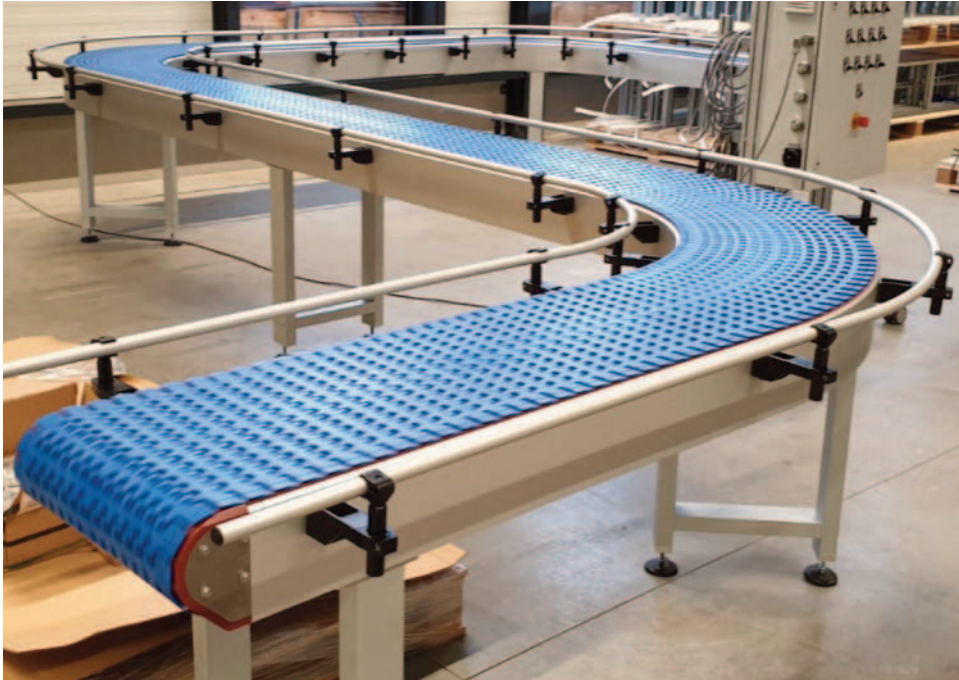

Designed according to your requirements , our FlexToo® conveyors are built and tested in our factories.

Many accessories (feet, guides, supports,...) are available for all our ranges.

- Highly durable curved plastic belt for multi-curve geometries
- Bending radii allowing very compact designs
- Particularly low-noise functioning
- Optimum safety for the workforce
- Motorised transfers, cable trays, control boxes, variable speed
- Conveyor designed for quick and easy maintenance
- Integrated cable trays
- Strong structure
- Modularity for easy line upgrades
- 5 widths : 227, 342, 418, 494 and 647 mm

Flextoo alu smooth 232 / 651 mm width

Robust and quiet for conveying large products in the food, cosmetics or pharmaceutical industries.

- Highly resistant curved plastic belt for multi-curve geometries
- Radii of curvature for very compact geometries
- Very quiet operation
- Smooth sides to prevent retention
- Optimum safety for the workforce
- Modular aluminium structure facilitates the evolution of the lines
- Maximum speed 60 m/min

Flextoo stainless steel 232 / 651 mm width

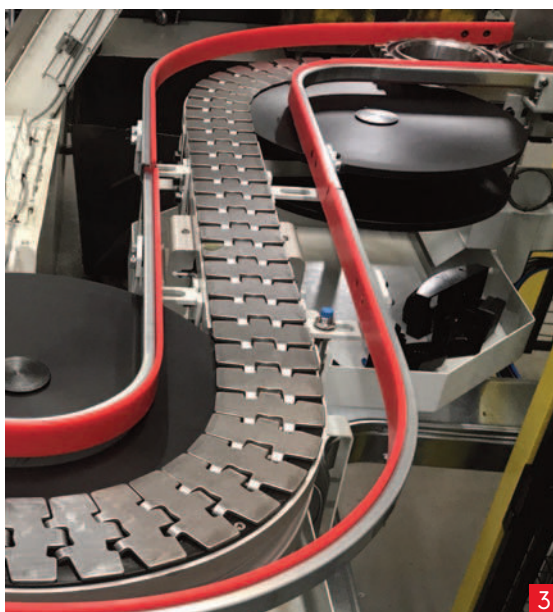

Robust and quiet for conveying large products in the food industry.

Designed according to your layout constraints, FlexToo® conveyors are assembled and tested in our workshops.

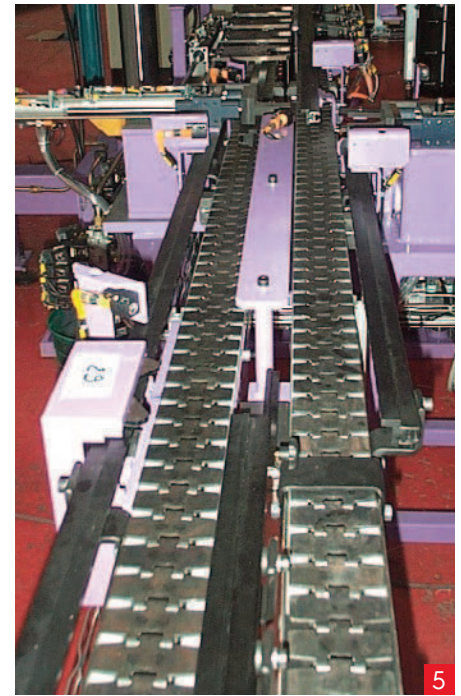

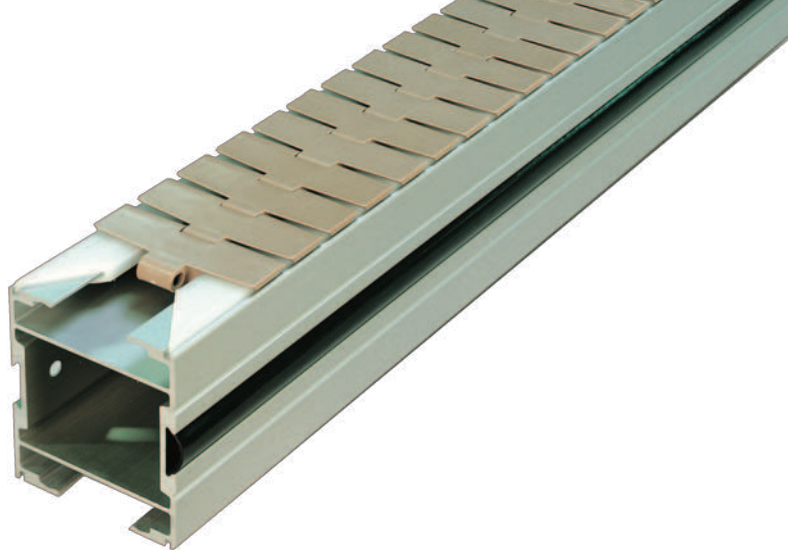

- Highly resistant curved plastic belt allowing multi-curve geometries
- Radii of curvature for very compact geometries
- Very quiet operation
- Open structure for easy cleaning
- Optimum safety for the workforce
- Modular stainless steel structure for easy line evolution
- Maximum speed 60 m/min

Robur 70 / 196 mm width

- 1 | Motor oil cans
- 2 | Porcelain parts before firing
- 3 | Mechanical industry
- 4 | Glassware
- 5-6 | Automotive industry
- 7 | Phytosanitary products

ELCOM / **FABER** / TRANSEPT

5

Our best solution for heavy duty ambients :

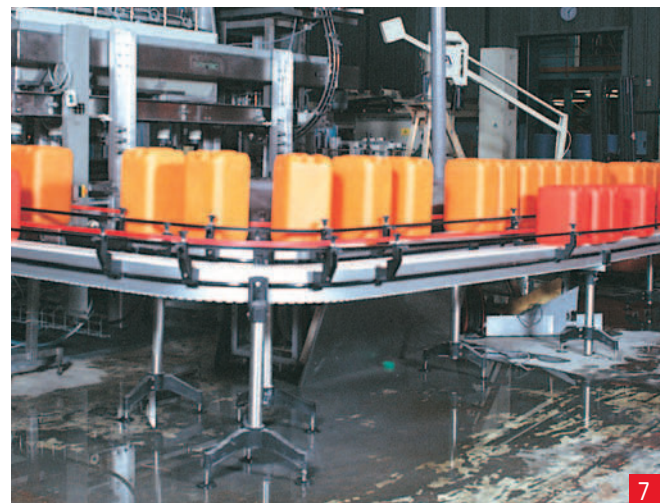

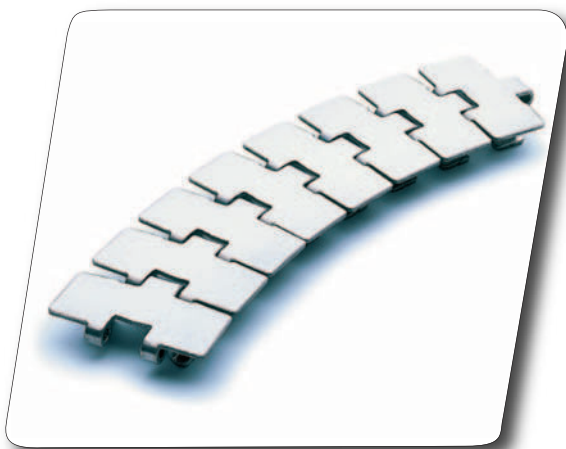

dust, oils, flow of liquid products, chips,
metal parts, heavy parts, abrasives, sawdust, sugar, cocoa...

**30 YEARS
EXPERIENCE**

- Robust
- Open or monobloc structure
- Unitary or packed products
- Widths 70, 86, 118, 196 mm
- Standard and low height
- plastic and metal chains, straight and curved

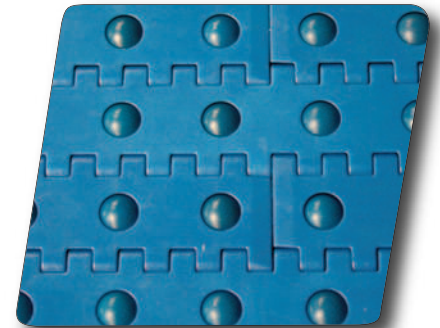

6

7

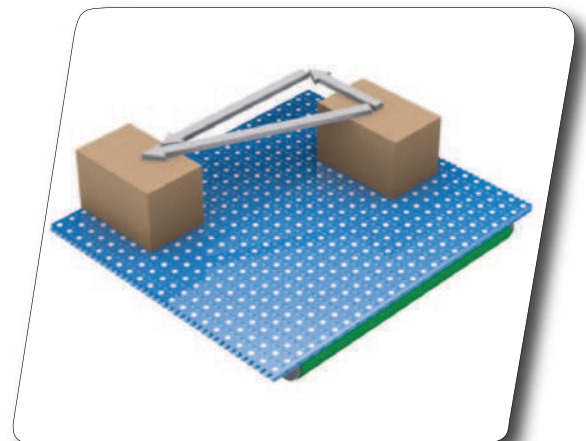

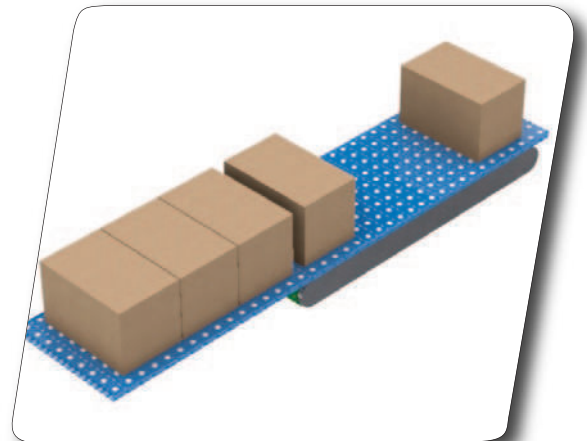

CAB : Ball Conveyor, 165 / 623 mm width

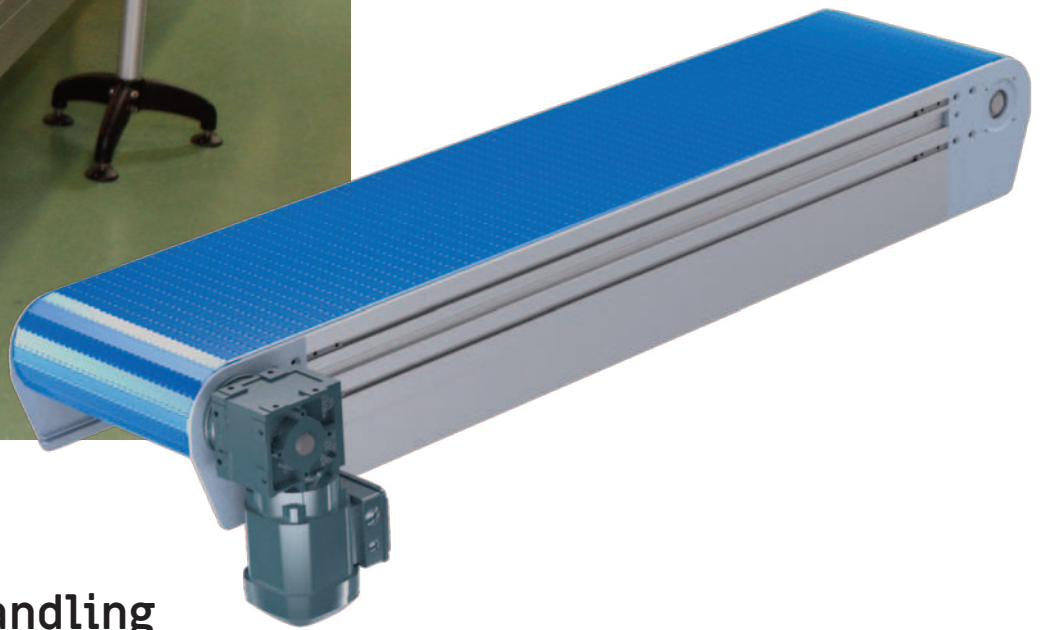

**Robust and quiet
for conveying and handling
cardboards and bulky products
with rigid bottoms.**

The modulation of the speed and direction of rotation of the balls allows different functions :

- Creating a pitch between products
- Decreasing the distance between products
- Stopping the product on the running conveyor
- Reversing the direction of product travel
- Lateral movement
- Reference to the fixed edge
- 90° transfer
- Ejection of non-conforming products

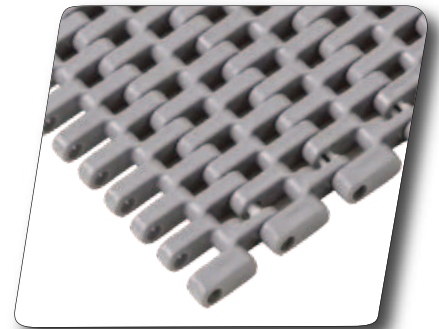

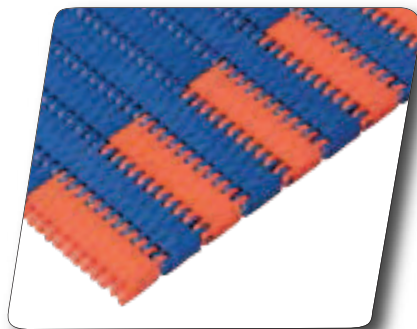

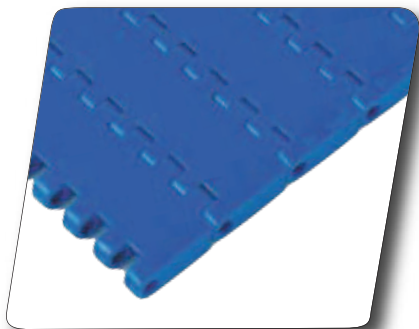

CAB-SB : straight conveyor, 165 / 623 mm width

**Robust and quiet
for conveying and handling
cardboards and bulky goods.**

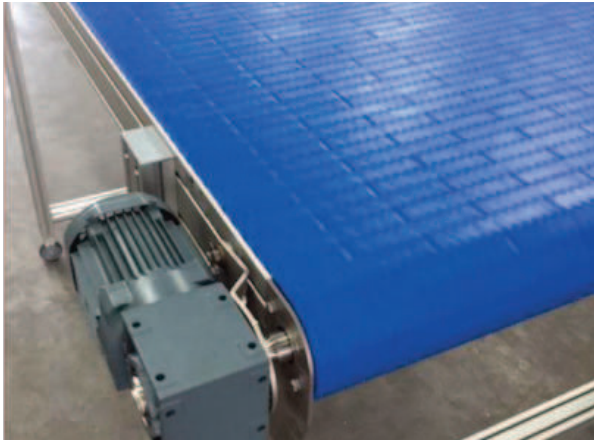

CAB-SB is available in various widths from 165 mm to 623 mm (larger widths on request)

- Modularity
- Robust construction
- Quiet
- Optimum safety for the workforce
- Quick and easy maintenance
- Smooth, open or closed belts with a pitch of 25.4 mm :

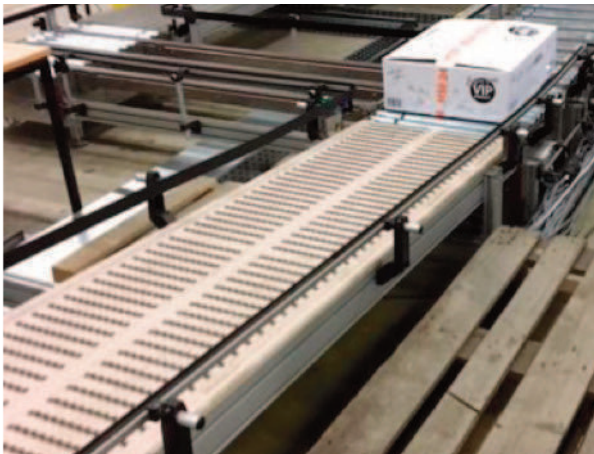

CMD Compact Straight-Line Conveyors

/ CMD ALU

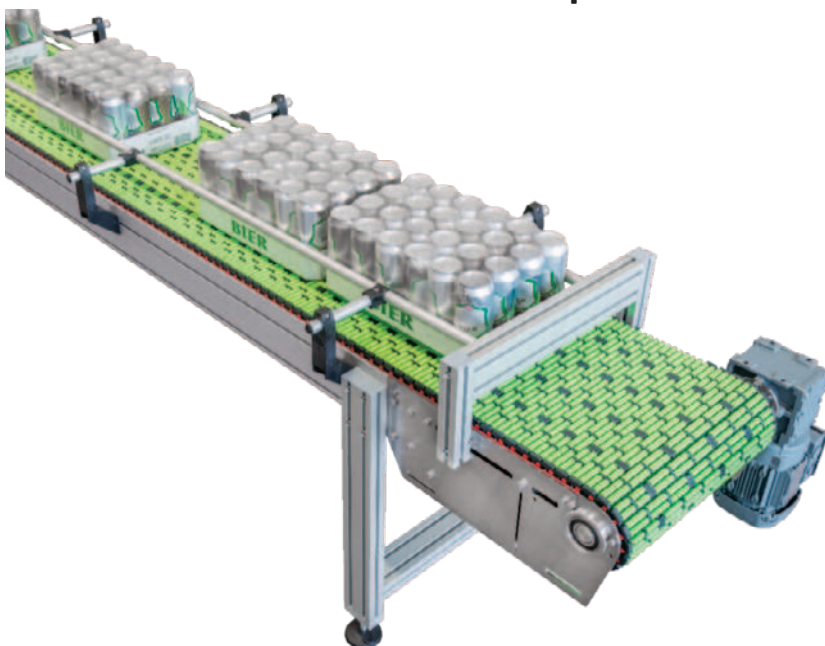

**Compact and quiet
for conveying cartons and bulky goods**

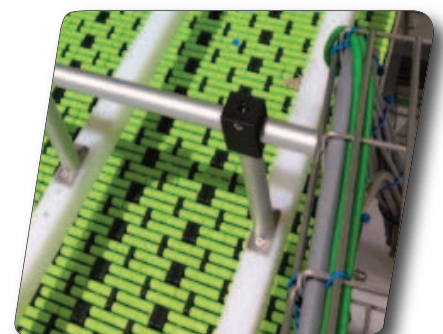

- Low vertical space requirement
- Numerous belt versions
- Modular aluminium structure for easy line changes
- Up to 30 m length and 350 kg load (depending on belt)
- Very quiet operation
- Optimum safety for the workforce
- Speed up to 50 m/min
- Widths from 163 to 926 mm

/ CMD ALU with rollers

Low pressure accumulation conveyor

- For products with rigid bottoms
- Small roller spacing
- Low noise level
- Speed up to 50 m/min
- 2 directions of travel possible
- Widths from 275 to 785 mm

ELCOM / **FABER** / TRANSEPT

/ CMD in STAINLESS STEEL

**Compact and quiet
for conveying large products
in the food industry.**

Designed according to your layout constraints, our conveyors are assembled and tested in our workshops.

- Low vertical space requirement
- Numerous belt versions
- Modular stainless steel structure for easy line changes
- Easy to clean
- Very quiet operation
- Optimum safety for the workforce
- Widths from 164 to 1003 mm
